Postdoctoral Opportunity

Jointly in the Single Molecule Biophysics Lab of Professor Michelle Wang and the Nanophotonics Lab of Professor Michal Lipson

Novel nanobiotechnology and nanophotonics techniques
Detection of single molecules
DNA motors and chromosome mechanics

The ideal applicant will have nanofabrication and laboratory experience in photonics, such as microfabrication and optical measurements. Experience with single molecule techniques and basic molecular/cell biology is preferred.

Applicants should submit CV and three letters of recommendation via mail or email to:

Michelle D. Wang
Howard Hughes Medical Institute
Department of Physics
Cornell University
518 Clark Hall
Ithaca, NY 14853
mdw17@cornell.edu

Michal Lipson
Department of Electrical & Computer Engineering
Cornell University
214 Phillips Hall
Ithaca, NY 14853
ml292@cornell.edu
